PROFESSIONAL SUMMARY

I graduated from **Istanbul University** with a degree in **Computer Engineering**. For nearly 13 years, I have been involved in **end-to-end web application development**, covering the full **software development lifecycle**—from business analysis and database design to backend development, frontend implementation, **UI/UX**, and deployment—along with **10 years of experience leading and delivering** projects for international clients. My technical expertise includes **MSSQL, PostgreSQL, C#, ASP.NET MVC, .NET Core, Go, JavaScript, jQuery, HTML5, CSS3, Razor, Bootstrap, Vue 3 and Flutter**. Experienced on **Clean Code** principles, **Clean Architecture** and **Vertical Slice Architecture, OpenAPI, FastEndpoint**, and both **RESTful** and **SOAP** services. I bring strong soft skills, including **Empathetic Leadership and Team Management, Team Motivation and Workload Planning, Project and Task Management, Stakeholder and Client Communication, Business Analysis and Requirement Engineering, Problem Solving and Decision Making, Cross-Team Collaboration, Adaptability and Ownership, Time Management and Multitasking**. Over the last 10 years, I have managed **customer relations** for the projects under my responsibility, supported **business development efforts**, and **overseen project planning** activities. Additionally, I have consistently led teams of around five people, combining technical expertise with **leadership skills**. I am **confident in my ability** to build and maintain **effective communication with clients, colleagues**, and managers.

SKILLS

Business analysis BPMN, SDLC, Software Development Life Cycle

Databases Management

Front-End Developer

Project management | Team Lead

UI/UX & Analysis tools

AI Tools

Back-End Developer

EXPERIENCE

Project Manager | Freelance Software Developer, 10/2024 - Current

Freelance – Ankara, Turkey

- Created an order pricing module running on Logo Software DB which is a great CRM + ERP product in Türkiye. Tech stack was **Ms Sql + .Net Core API + Vue 3** in frontend.
- Developed an insurance application for a customer. Magdeburger Insurance Company API is fully implemented in project and used for pricing insurance requests.
- An apartment management system developed in **PostgreSql + .Net Core 10** and **Vue 3**.
- Three mobile application developing in tech stack like **PostgreSQL, GO API, Flutter** in mobile and **Vue 3** in web application (still working on these 3 apps). **AI tools** are heavily used in these processes.
- Contributing to two volunteer open source project, one of improved-clone like discord and one is ai supported, web crawler(like LinkedIn and Github) skill-card generating project.

Project Manager, 05/2023 - 10/2024

Alternatif Enerji – İstanbul(Asya)

- **Managed a team of 5 developers and coordinated with customers** while developing a settlement application for producers under the Unlicensed Electricity Producers Regulation.
- The **application connects to National Remote Meter Reader** systems, collect data and generates a summary for settlement. In this project **tech-stack was like Ms Sql + .Net Core 10 + Vue** in frontend.
- Also project has a mobile application coded in **Flutter** and an optical port reader was used to read meter data **via bluetooth low energy** connection.
- We create integrations to two **Rest API Services** and one **Soap Service**.
- **Clean Architecture** and **Vertical Slice Architecture** used with **OpenAPI** and **FastEndpoint**.
- Delivered significant operational efficiency by developing software that reduced a process typically requiring approximately **100 man-days to under 5 minutes**. The solution required a 3-day preparation phase conducted outside peak operational periods. The project was successfully delivered **within one year** and subsequently adopted by three additional customers in the same sector. Through this project, I gained hands-on experience with **Vue js, Flutter, and the energy sector** domain.
- While leading the team, I established a structured documentation process for project tracking and knowledge sharing. Defined meeting note templates, introduced effective **Jira** usage practices, promoted diagram-based documentation, and improved **time planning** of the team members and **task organization**.
- Coordinated with cross-functional teams to **resolve project issues** and **mitigate risks**.

Software Specialist, 12/2013 - 04/2023

Bordo Yazılım – Ankara

- Developed various web applications including **buzzfile.com**, **proficyclops.com**, and **click2refund.com** and many others.
- **Buzzfile.com**: Buzzfile is like a companies social media platform. It consists statistical data of companies, demographic data of locations and people are working in the United States.
- Worked for 9 years in this project. This project coded in 6 different **.Net frameworks** from version **4.6 to .Net Core 5**.
- Data stored on **MsSql** Database and **Lucene search indexing** used for searching.
- **Html5 + Bootstrap + JQuery + Razor** used for frontend development.
- Started in junior frontend developer position and completed as **Team Leader & Project Manager**.
- Managed customer relations and **SDLC** processes. **Agile-Scrum-Sprint** methods used to manage the project lifecycle.
- As a part of **customer relation** process, co-worked with graphic designers to be sure all we are on the same page so, gained **UI/UX experience** in addition.
- **ProfitCyclops.com**: ProfitCyclops is a marketplace efficiency tool, working on amazon.com marketplace data. Sellers can see their own products, sells, incomes, stocks, other warehouses and minimum price operations.
- My role was **Team Leader and Project Manager**.
- Designed the **project architecture**, developed a **code-first database** (MS SQL Server) and UI layer generated using **HTML5, Razor, jQuery, and Bootstrap**.
- Also developed amazon.com integration layer. Any seller can be a member and can start pull data from **Amazon Marketplace API**.
- The main problem was while the member count grows the request count also growing exponentially.
- This problem solved by distributing each customer's request across different times of the day. As the project grew, it was planned that requests would be processed using **queue systems** like **Redis** or **RabbitMQ**.
- **Click2Refund.com**: Click2refund provides a flight compensation service. Platform generated to collect passenger data. All legal proceedings are run by people yet tracked on software.
- This project's tech-stack is **Html5 + Razor + JQuery + Bootstrap**, same as before. Unlike others, we applied a **web-crawl layer** in this project.
- Tickets were tracking on this application.
- Ticket agents represents, flight customers, lawyers of Click2refund and Customer Relations Staff were able to work on same system.
- This was a crm-like web application in summary.
- **In addition to the main projects**, I contributed to and led multiple web and mobile application projects across various sectors like **construction, travel, entertainment, and pharmacy**. Also

developed projects in **government (ministry) systems, corporate presentation websites, and tender management** applications.

- **Led and coordinated** development teams ranging from 4 to 9 members.
- **Asana** task management program used for planning and tracking in general.
- **Last 7 years, I served as project manager and team leader** in this company. Improved my software development skills with additional project management capabilities.

Assistant Software Specialist, 09/2013 - 12/2013

Infoline Bilgi Teknolojileri – Ankara

- Worked in the **R&D Department** of the Informatics Sector and i developed a native Android application for disaster management.
- The application enabled real-time location sharing and coordinated emergency response teams by determining required resources such as firefighters and medical personnel, significantly accelerating first aid response times.
- Enabled rapid coordination by delivering 10 notifications about support team and their location details in under one minute, eliminating the need for approximately 15 minutes of phone communication.

Software Engineer, 03/2013 - 08/2013

Albaraka Turk Bankası – İstanbul(Avr.)

- Developed **Windows Phone applications** during a long-term internship to digitize the credit application documentation process.
- By capturing and transmitting document images.
- The solution was used as a proof of concept for a core banking product and reduced the documentation process from approximately **one week to under 1 hour**.

Computer Engineer, 11/2012 - 06/2013

İstanbul Üniversitesi – İstanbul(Avr.)

- Developed a mobile version of the official university website using **MSSQL, .NET, and jQuery Mobile**, adapting existing desktop web screens for mobile devices. Implemented data access using **LINQ** and performed SQL query optimizations. Mobile version used until a full upgrade made on the product.

Computer Engineer, 06/2011 - 08/2011

Roketsan A.Ş. – Ankara

- Developed a **PLC program** during an internship to control a traffic light system for a crossroad, managing a 2-minute timed sequence in a continuous loop. Internship period was for 20 days and this application completed in period.

- Prepared comprehensive software documentation as part of the project plan, including diagrams, technical explanations, and system schemas, and summarized the work in the internship report.
